

UVTech T-4 Disinfection System

Ultraviolet technology that cleans your tech devices in as little as 45 seconds.

The same disinfectant technology used in air, food, water, and health care industries is now available in a compact system: the **UVTech T-4**. This system is ideal for disinfecting laptops, tablets, smart phones and other tech devices like cables, routers, and external hard drives

"If it fits, it can be disinfected."

- **Extra-large capacity holds up to 28 Chromebooks at once, making disinfection fast and easy.**
- **Adjustable rack holds a wide variety of tech devices.**
- **36 Watt G36T* Phillips UV-C Germicidal light bulb (*or equivalent) kills surface viruses, bacteria and fungi in seconds, including Coronavirus and E. Coli.**
- **Includes heavy-duty pull rope and premium casters for easy maneuvering and portability.**
- **Enclosure dimensions: 54" x 18" x 21".**
- **Heavy-duty, powder-coated aluminum construction for strength and durability.**

Safety Notice:

The UVTech T-4 system is not activated until the lid is closed and the safety interlocks are engaged, preventing any UV light exposure. The system will shut down immediately when the lid is opened.
